DETAILED ACTION

Claim Rejections - 35 USC ∋ 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 36-40,43-44, and 47-56 are rejected under 35 U.S.C. 102(b) as being anticipated by Fair et al (#5,984,791).

Fair et al show a seat assembly comprising a seat (110), a seat back (112) connected to the seat (14), a support member (20), an arm (30) pivotally supported by the support member, and a plurality of gear teeth (90). A drive shaft (86) is rotatably supported and a sliding pin (78) is slidably supported by the support member and in mechanical communication with the shaft.

With claims 37,48, and 53, at least one lever arm is pivotally attached to the support member at a pivot point and wherein the lever arm rotatably supports the shaft at a first end and a link arm at a second end, with the link arm further connecting to the sliding pin.

With claims 38,49, and 54, a slot is formed in the arm and a stop pin is attached to the support member. The slot slidably interfaces the stop pin for defining a rotational range of motion of the arm relative to the support member.

With claim 50, the shaft is also slidably supported in the first slot by the support member for sliding from a first position to a second position in response to the gear interacting with the gear teeth for moving the blocking pin to the second position.

With claims 40, 51, and 56, the arm is able to rotate relative to the support member when the shaft is in the second position.

Allowable Subject Matter

Claims 41-42 and 45-46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

The examiner has reviewed and acknowledged the applicant's Amendment, filed on April 7, 2005. Based on another examination of the claims, the examiner has decided to issue new prior art rejections. Therefore, this Office action is considered to be Non-final.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Galumbeck, Servadio, Sakuma, and Kajioka et al are cited as showing similar types of seat hinge assembly.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A. Vu whose telephone number is 571-272-6862. The examiner can normally be reached on M-F from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter M. Cuomo can be reached on 571-272-6856. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
